Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	[Mastery Add Coins]	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?
The user will be prompted to enter the amount of pennies, nickels, dimes, and quarters they have/ want to total.	The program will then add the value of all the coins together (note I multiplied the users number entered by the dollar amount the coin was worth Ex. 5 quarters $5 * 0.25$). The program does this in a different method called <code>getDollarAmount</code> . It will then send the total amount back to the main method.	The computer will then output the final total received from <code>getDollarAmount</code> .
