Mastery Group Assignment Error Log

Credit Name: CSE 2110 Procedural Programming 1
Assignment Name: Mastery Group Assignment

Describe the errors you've encountered while working on this assignment. What caused the error and how do you overcome the error?

Error 1.
The Error/change I ran into on this was related to determining the first letter of the last name, originally I had the code in a string format like this which worked fine for determining the first letter.

```
String firstletter = lastname.toUpperCase().substring(0, 1);
```

But after looking through some comments on stack overflow and more information on char I switched the code to this. (it takes up less and a lot of people on StackOverflow seemed to come to the common consensus that this was better so I decided to implement this)

```
char firstletter = lastname.toUpperCase().charAt(0);
```
